Eurol Petrol System Cleaner

Additive for maintaining the entire fuel system

Description

Eurol Petrol System Cleaner is an additive, formulated to rapidly clean the entire petrol fuel system.

Eurol Petrol System Cleaner is advised to be used if you notice that the petrol quality is of inferior quality and the engine suffers from power loss. If the petrol quality is inconsistent, it can cause carbon deposit build-up, inefficient ignition and combustion and poor power output. Especially small, high output engines are extremely sensitive to deposits that build up in the combustion chamber and the fuel system.

Eurol Petrol System Cleaner can also be used if poor quality fuel has been used over some time, to cure problems which have been accumulated during the use of lesser quality fuel. After using Eurol Petrol System Cleaner you can hear and feel a significant difference in how the engine runs.

The 250ml bottle of Eurol Petrol System Cleaner is recommended for use in 35L to 65L of fuel. For optimal

results, use in two consecutive tanks of fuel or every 2.500 km. Shorter use intervals are recommended with in-city driving and bumper to bumper traffic.

Users should consult the Material Safety Data Sheet of Eurol Petrol System Cleaner for information about storage and shelf life. Please ask Eurol Research & Development if any further information is required.

Physical properties

Density at 20°C	0.808 kg/l	ASTM D 1298
Viscosity, kinematic at 40°C	2.8 cSt	ASTM D 445
Flash point	62 °C	ASTM D 93

E802512

Version 1.1, 17-08-2020

This sheet contains recommendations or suggestions on properties and possible applications of Eurol products. Because of continuous product research and development, the information in this document can be changed at all times, without foregoing notice. The analytical information in this document consists of typical incorrectness of the text. The reader is advised to make the final product choice in dialogue with the supplier.
