Heavy duty diesel engine oils - Fully Synthetic

Eurol Syntruck XLD 10W-40

Engine oil for extra long drain intervals for use in trucks

Description:

Eurol Syntruck XLD 10W-40 is a fully synthetic engine oil, conforming to the latest demands. This oil provides an exceptionally good protection against "bore-polishing" and has a superior oxidation stability, as well as resistance against high temperatures.

Due to its fuel saving properties, Eurol Syntruck XLD 10W-40 is exceptionally suited for use in highly turbocharged engines used in trucks, buses and industrial vehicles. Because of the special additive technology, both the engine and engine oil are kept clean in an unprecedented way.

Eurol Syntruck XLD 10W-40 is suitable for extra long drain intervals, if these are allowed by the engine manufacturer, depending on operational use and used filtration-method, reducing maintenance costs.
