# Eurol Diesel Performance Plus

Fuel additive to enhance the performance of diesel

## Description

Eurol Diesel Performance Plus is formulated for use in all diesel engines. Eurol Diesel Performance Plus boosts the cetane number by up to 6 points. This improvement in cetane will improve combustibility of the diesel fuel, while providing additional power and efficiency of diesel engines at both warm and cold temperature.

At lower temperatures, Eurol Diesel Performance Plus will improve the engine start-up as the diesel fuel is more easily combusted. At operating temperature, the car will feel more responsive and more lively.

At constant load, Eurol Diesel Performance Plus will increase fuel economy and reduce emissions due to a more complete and efficient burn. Eurol Diesel Performance Plus can be used with naturally aspirated or turbocharged engines, as well as indirect injection, PD (Pumpe Düse) engines and common rail engines.

The 250ml bottle of Eurol Diesel Performance Plus is recommended for use in 35L to 65L of fuel. Add the Eurol

Diesel Performance Plus to the fuel tank before refueling.

Users should consult the Material Safety Data Sheet of Eurol Diesel Performance Plus for information about storage and shelf life. Please ask Eurol Research & Development if any further information is required.

## Physical properties

Colour	Brown	
Density at 20°C	0.848 kg/l	ASTM D 1298
Viscosity, kinematic at 40°C	2.8 cSt	ASTM D 445
Flash point	62 °C	ASTM D 93

E802490

Version 1.0, 25-03-2016

This sheet contains recommendations or suggestions on properties and possible applications of Eurol products. Because of continuous product research and development, the information in this document can be changed at all times, without foregoing notice. The analytical information in this document consists of typical incorrectness of the text. The reader is advised to make the final product choice in dialogue with the supplier.
